

Sustainability Policy

Last updated: 9 October 2025

Chelmer Surgical Supply Ltd is committed to operating as a responsible manufacturer of Class III sterile neurosurgical patties. As a small, highly streamlined business, we actively seek to minimise our environmental impact in ways that are proportionate, practical, and effective.

1. Our Approach

We recognise our responsibility to the environment and strive to reduce our environmental footprint wherever possible. While our operations are focused and low volume, we are committed to continual improvement in the areas of energy use, materials management, and waste reduction.

2. What We Do

Our current sustainability efforts include:

- Operating from a compact, energy-efficient site with minimal overhead
- Minimising packaging waste by using appropriately sized, recyclable materials
- Working with suppliers who demonstrate compliance with environmental regulations
- Reducing unnecessary travel by using remote audits and digital documentation where possible
- Maintaining lean inventory and low material wastage across production
- Reusing or recycling cleanroom materials where safe and permitted under ISO 13485 controls

3. Our Commitment Going Forward

We will continue to:

- Monitor and review our operations for opportunities to reduce energy use, waste, and emissions
- Choose environmentally responsible options where available and appropriate
- Engage with suppliers to encourage good environmental practices
- Support regulatory and industry initiatives aimed at improving sustainability in medical device manufacturing
- Work with logistics providers who offer tracked delivery, route optimisation, and digital proof-of-delivery to reduce emissions and paper waste.
- Where possible, we consolidate shipments to reduce transport frequency and packaging volume.

4. Contact
